

## Overview

We specialise in the design and manufacture of bespoke; IWOCS, production control systems and subsea assemblies. We also offer a comprehensive range of services to support these assets in the field.

Bespoke units (containerised or skid-mounted) can be designed in terms of; footprint, height and weight to clients requirements for operation in either safe or hazardous areas.

## Features

- Integrated electrical / fibre-optic / communications junction box
- Interface orientation can be tailored to client preference
- Carbon or stainless steel frame
- Choice of painted or galvanised finish
- Stainless steel panel comes with doors and view window

## Added Value Services

- Proof Pressure Test / Flush / FAT Testing
- Maintenance and technical support services

## Manufacturing Process

- All manufacturing processes are accredited by Lloyds ISO 9001:2015 / OSHAS 18001:2007
- All stages of fabrication and assembly can be carried out on site thereby ensuring full control of quality and production processes
- Production welding can comply with any specific quality or industry standards
- Experienced using conventional and exotic materials including; inconel 625, 6Mo, duplex, super duplex and hastelloy C276

## Certificate of Compliance

- CE compliant (including ATEX and machinery directives)
- IECEx certification if required
- Certification to DNVGL-ST-273
- NORSOK compliance
